

AC or DC Hour Meter

Part No. T50A286

Provides precise tamper proof record of operating time of engines and other electromechanical devices. It mounts in standard 2" opening. Typical use is to monitor running time for vehicles and machinery for maintenance scheduling, warranty, rental use and service records. Locking snap-on retainer secures meter firmly to panel from the back. No visible fasteners.

Features

- UL/CSA Recognized Component
- Hermetically sealed to keep out dirt and corrosive gases
- 6 digit display - 99,999.9 hrs, auto rollover
- Low power consumption
- No battery needed
- Accurate quartz crystal oscillator
- Solid state drive circuits
- Shock resistant to 8g
- Wide temperature range
- 1/4" quick connect blade terminals
- Fits 2.00" diameter hole

Technical Specifications

- Voltage: 115VAC (50-60Hz)
- Power consumption: less than 0.4 watts
- Shock Operating: 8 G (10-75HZ 1-8 G)
- Accuracy: $\pm 0.02\%$ over full range
- Operating Temp: -30°C to $+65^{\circ}\text{C}$
- Time Scale: 6 digits 99,999.9 hrs. Automatic recycle to zero
